

HANEN ® PROGRAMS:

It Takes Two to Talk®

This program for parents focuses on early language intervention for young children with receptive and/or receptive language delays. It Takes Two to Talk aims to enable parents to become their child's primary language facilitator, thereby maximizing the child's opportunities for communication development in everyday situations. It Takes Two to Talk is designed for toddlers and preschool-age children with specific language impairment, as well as for children with cognitive and developmental delays under age five.

More Than Words®

The More Than Words program gives parents of children with Autism Spectrum Disorder (ASD) and related social communication difficulties practical tools to help their children communicate. More Than Words emphasizes the child's everyday activities as the context for learning to communicate. More Than Words is organized around four major goals:

- Improved two-way interaction
- More mature and conventional ways of communicating
- Better skills in communicating for social purposes
- An improved understanding of language

You Make the Difference®

You Make The Difference supports parents of typically developing children, birth to 5 years, who would like to learn more about fostering and enriching their child's early language, social and literacy development during positive everyday interactions. It can also provide support to vulnerable families whose children's learning may be at risk due to environmental and/or societal challenges. You Make the Difference helps parents connect with other families and resources in their community.
